

INLINE® BLUETOOTH 5.1 HIFI AUDIO RECEIVER

The Bluetooth 5.1 HiFi Audio Receiver from InLine transmits audio signals in highest quality (96kHz / 24-bit) either via Bluetooth e.g. from a smartphone or as DAC via USB-C e.g. from a PC to a HiFi music system or active speakers. For audio output, a RCA stereo or an optical Toslink connection is available. The receiver features a volume control, 7 preset equalizer profiles and an OLED display. A fast connection, intuitive operation and high range complement the excellent signal transmission. This makes the InLine Audio Receiver the perfect accessory for older AV receivers.
